

Enrollment via TUMonline

You have received an offer of admission at TUM, and would now like to enroll? On this website we show you the necessary steps. Enrollment is done via TUMonline, where you will receive a list of documents you need to upload to TUM together with your application for enrollment.

1. Offer of admission

In order to be enrolled at TUM, you must first be granted **admission** to the program for which you have applied. You can find out whether you have been admitted in your TUMonline account under *My Applications* in the menu item *Admission*. In addition, you will receive an e-mail from us informing you about the admission as well as about further steps required for enrollment at TUM.

Under the menu item *Admission* you can download your letter of admission.

2. Accept your study place

Another prerequisite for enrollment is the **acceptance of the study place**. To accept your study place click on the button *Accept study place offer* in TUMonline under the menu item *Study Place*.

Please accept your study place in TUMonline as soon as possible. You can accept the study place by the enrollment deadline. But we recommend you do so before the semester begins, to complete the enrollment process by the deadline.

If you do not wish to begin your studies this semester, you must reject your place and reapply for your desired semester. For more information on reapplying, please refer to our website on [Reserving your Spot or Deferring your Studies](#).

Next steps

You have the option to accept or decline your place in your desired degree program. Please note the following:

- Your official acceptance of this offer is a prerequisite for enrollment at the Technical University of Munich. All steps required for enrollment are explained here: <https://www.tum.de/en/studies/application/enrollment/>
- Please accept your study place in the degree program as soon as possible if you wish to start your studies. We recommend enrolling before the start of the semester so that you can begin your studies without any difficulties. You can accept a place in a degree program up to the enrollment deadline five weeks after the start of lectures.
- Please note: If you are subject to tuition fees, your new or continued enrollment will only be processed once semester fees and tuition fees for all degree programs have been received. This also applies if you are already studying at TUM and want to enroll in an additional degree program (parallel studies). You can find the amount of all outstanding fees in the TUMonline application under "Tuition Fees".
- Before your enrollment, you need to submit a request to one of the German statutory health insurance providers to send digital notification of your insurance status to TUM. You will find all information regarding mandatory health insurance here: <https://www.tum.de/en/studies/application/enrollment-info-portal/mandatory-health-insurance>
Until the digital notification arrives, there will be a suspension in your TUMonline account preventing you from being enrolled. You can see this suspension after login in TUMonline. After the digital notification arrives, the suspension will be removed automatically: <https://www.tum.de/en/studies/application/enrollment-info-portal/suspension>
- If you cannot commence your studies this semester, please reject the offer of admission and reapply for the desired semester. This does not mean that you lose the admission. For more information on renewed application for admission, visit <https://www.tum.de/en/studies/application/reserving-your-spot/>
- **Please consider that you must be enrolled to register for courses.**

3. Complete your data and upload your documents

After you have accepted the study place, click on the button *Add data* under the menu item *Enrollment*.

Then fill out the form for the *residual data entry* and upload the necessary documents, if you have them. You can also upload the documents at a later date. In this case, skip the form for uploading the documents and complete the data entry. You will find the deadline for uploading the documents in the details of the respective document.

After you have completed the residual data entry, the link to the application for enrollment will be activated. If you cannot see the application for enrollment, you have not yet completed the residual data entry.

Next steps

Click on "Add data" to submit missing documents required for enrollment. Then, you will have access to your Application for enrollment.

 Add data

Once you have add your data, download the **Application for enrollment**
 You must sign this application digital and upload it in the document checklist within the enrollment deadline.

 Print Application for enrollment

Under the menu item "Documents to be submitted (for enrollment)", you can click on a document for further information on the required form for submission. The deadlines can be found on the info pages about your degree course: <https://www.tum.de/en/studies/degree-programs/>. Students registered for courses as auditors do not need to submit any documents for enrollment.

Please transfer the **Semester fees** by March 15th for the summer semester or until September 15th for the winter semester so that you can be enrolled before the semester begins. If you are an international student from a non-EU/EEA country, you also need to transfer the tuition fees for your degree program. Further information is available under: [Semester fees](#). Transferred fees will appear in your TUMonline tuition fee account within approx. 5 working days. We ask you not to contact us unless your payment has not been posted to your account after at least one week.

You will be enrolled at TUM after all documents (see list of documents) have been entered in TUMonline as received and correct, you have been admitted and accepted the offer of admission, and you have transferred the semester fees within the deadline. As soon as you have fulfilled all of the indicated enrollment requirements, you will be automatically enrolled within 24 hours, at the earliest from mid-January for the summer semester and from mid-July for the winter semester.

Please consider, that you must be enrolled to register for courses.

4. Complete the application for enrollment and upload authentic documents

After you have completed the residual data entry, the link to the **application for enrollment** will be activated.

Sign the application for enrollment manually or digitally and upload it together with the missing documents for enrollment. Applicants who have submitted a VPD for admission must upload all those documents that have been uploaded to uni-assist to apply for the VPD in order to enroll at TUM.

Please upload all proof of qualifications, diplomas, and certificates as well as any other required documents as authentic documents. These documents must bear the signature and seal of the issuing official body, alternatively a digital seal, a verification code, or a QR code for online verification.

Only educational certificates are required (e.g. school reports/certificates, transcripts, exam results). **Please do not upload CVs, motivation letters, or language certificates.**

5. Have your health insurance status digitally confirmed

Before you can be enrolled, your health insurance status has to be **confirmed by a digital notification sent from a German public health insurance company (AOK, TK etc.) directly to TUM.**

All applicants therefore need to contact a German public health insurance provider before enrollment – regardless of your country of origin.

The public health insurance provider confirms that you are already insured sufficiently or that you are exempt from the insurance obligation.

As soon as the statutory health insurance company can confirm your insurance status, it will be **digitally transmitted to TUM** (TUM's number is H0001558). Without this notification from the health insurance company, you cannot be enrolled.

Until the digital notification arrives, there will be a [suspension](#) in your TUMonline account preventing you from being enrolled.

[Here you will find all information about mandatory health insurance and data transmission.](#)

Suspensions

Sperrungen				
Semester	Reason	Course of study	Lift bar automatically upon completion of	on
21S	fehlende student. Krankenvers.	1630 29 350 Architecture (Master of Arts)		08.03.2021 14:41:46

View of the detail page in TUMonline regarding the suspension due to lack of confirmation of the health insurance status.

6. Transfer the semester fee and, if applicable, the tuition fees

Please transfer the [semester fee](#) and, if you are required to do so, the [tuition fees for international students from third countries](#) in due time.

The payment deadline and details on the amount of the fee can be found in your [TUMonline account](#).

7. Be enrolled

You will be enrolled at TUM as soon as

- you have received an offer of admission,
- you have accepted the study place,
- all documents (see list of documents in TUMonline) have been received by us in due time, are fully processed and marked as correct in your TUMonline account,
- you have transferred your semester fee and, if applicable, the tuition fees for international students in due time,

- your [health insurance status has been confirmed](#) by a digital notification sent from a German public health insurance company.

Please note:

- Enrollment is only possible until the enrollment deadline. The deadlines for the upcoming semesters can be found on our [website on dates, periods and deadlines](#).
- Registration for courses is only possible after complete enrollment.
- Also, the services for students (e.g. university library, cafeteria, semester ticket, etc.) can only be used once enrollment has been completed.
