Start a TUM Student Club

You want to start your own TUM Student Club? No matter if you have an idea or an entire project group – here's some tips to get started.

And if you have any questions, please don't hesitate to contact us.

Requirements

All students at TUM can establish a TUM Student Club at any time.

There are practically no limits or restrictions to establishing a TUM Student Club, provided its activities and purpose do not contravene Germany's liberal democratic basic order or safety and order at TUM.

Inspiration

Take a look at the [TUM Student Clubs](#) on our website - maybe you already find an initiative that matches your interests? On the websites of the respective student clubs you will then find the contact details as well as helpful information on how to join the student group.

Members

Talk to other students to find out if they are interested in joining your student initiative. Post on social media, also discuss your initiative with scientists in your TUM department/school, you will be surprised how many people share your interests.

Finding a name

Choose a name for your TUM Student Club. Check whether the name already exists, whether the activity and purpose of the group are clear, and whether the name appeals to the desired target group.

If you would like the name to include "TUM", or "at TUM" it is necessary for the TUM Center of Study and Teaching to review the status of the group and approve its name. Please contact studentclubs@tum.de in this matter.

Visibility

Create an own website or social media account for your TUM Student Club so that interested students can find out about your activities. If you send a completed [self-declaration](#) to studentclubs@tum.de, we will also present your initiative on our TUM Student Clubs website.

Accreditation

Once your Student Club counts at least 5 members, you can apply for accreditation by the [TUM Student Council](#) and receive further [support](#).

Further Questions?

Your question has not been answered yet? Feel free to contact us by e-mail to studentclubs@tum.de. Your TUM Student Club Coordinator will be happy to help you or to put you in touch with the right person.

**Support for
TUM Student Clubs?**

You have already started your own TUM Student Club and are looking for support?

Here you will find an overview of the various offers and services at TUM. If you have further questions or feedback, please do not hesitate to contact us.

Advice from your Student Club Coordinator

As Student Club Coordinator, Anne Hüttenrauch is your central contact person for questions and concerns regarding your TUM Student Club. Feel free to contact us via the e-mail address studentclubs@tum.de. We will be happy to help you, to provide you with further information or to put you in touch with the right person.

TUM Student Club Wiki

The new [wiki](#) is an ever-growing collection of answers to your most important questions and useful tips. Whether you are looking for specific information or just want to browse, it is worth checking back as new content is added regularly!

Student Council of TUM

The [TUM Student Council](#) represents the interests of all TUM students and is therefore also an important contact for the TUM Student Clubs. The topics include, for example, the provision of work spaces for students (StudiTUM houses) or the organization of cultural events (e.g. TUNIX and GARNIX). Through the service [Verleihnix](#) there is an extensive range of material that you can also rent for your events.

And once your TUM Student Club is accredited by the [Council of Student Representatives](#), you can benefit from further support. Find out more under the heading "[Accreditation](#)" of your TUM Student Club.

Accreditation

In addition to the "**Accredited at TUM**" label, the accreditation of your TUM Student Club offers many other advantages:

- **Public relation support**, e.g. through the use of info screens and publication in the TUM Campus App
- **Technical support**, e.g. through mail services
- **Further funding opportunities**, e.g. for StudiTUM funding and project funding through the Friends of TUM e.V.
- Reaccredited student clubs receive a **certificate with the TUM logo**, on which they can confirm student commitment to their members.

- You can find all the benefits on the website of the [Student Representatives](#).

Once your student club has at least 5 members, you can apply for accreditation by the Council of Student Representatives.

Rooms at TUM

You need a room for an event or a working meeting of your TUM Student Club? Student clubs can rent several rooms and spaces at TUM (seminar rooms, conference rooms, lecture halls, foyers etc). In our [TUM Student Club Wiki](#) you will find an overview of TUM's offers and a step-by-step guide to rent a room with ZA4 - Real Estate. The documents required for renting are available in the [download section](#).

Even if you don't find a room at TUM, we can help you with tips on alternative space.

An alternative to booking rooms centrally via TUM are the StudiTUM houses. As soon as your Student Club is accredited, you can apply for [StudiTUM status](#) via the Student Representation. This gives you storage facilities and room booking rights in the StudiTUM Houses.

MAKERSPACE - High-Tech Workshop

At Campus Garching and in Munich (Munich Urban Colab), MAKERSPACE offers publicly accessible high-tech workshops with high-quality machines, the latest CAD software, qualified trainers and a large community of creative and helpful people.

MAKERSPACE offers courses and memberships - as well as [scholarships](#) for students so that they can work on their projects quickly and cost-effectively.

The workshops include metal and wood workshops, electronic labs, 3D printers, laser cutters, a water jet cutting machine and a robotic lab. Further information can be found directly on the [MAKERSPACE website](#).

ECTS for Student Projects

Are you involved in a TUM Student Club and would like to receive ECTS for planning and implementing a project?

The module "TUM inspires – Student Projects" offers you the opportunity to realize your own ideas for your Student Club in a project, to deepen key competencies such as project management and team communication in accompanying workshops and to reflect on your experiences in a project report. The project work can be done in a team or alone. You can receive 3 ECTS for the module (depending on your TUM School / Department).

For further details on the formal requirements, the contents of the module and how to register, please visit the [website](#) of Kontextlehre Wissenschaft, Technologie, Gesellschaft (in German).

Leave of Absence

If your involvement in a TUM Student Club requires a increased level of commitment for a limited period of time, you have the possibility to take a leave of absence for this purpose. Please contact studentclubsqtum.de for advice on the required supporting documents for a leave of absence for this reason.

For detailed information on requirements, deadlines and application procedures please see [Leave of Absence](#). It is important to submit the application for leave of absence within the official deadline, supporting documents can be submitted later within a certain period of time.

In order to determine how a leave of absence will affect your studies and what it means for you in your particular situation, you must first inform yourself, if necessary, you can also consult your [departmental student advisor](#).

Financial Support

If you plan on collecting donations or membership fees with your TUM Student Club or are looking for commercial sponsors, a legal form such as a registered association (Verein) is recommended. As a university sub-group of an umbrella organization, you can also inquire about financing opportunities there.

TUM Association of Alumni and Friends:

As an accredited TUM Student Club, you can also apply for financial support from the TUM Association of Alumni and Friends "Freunde der TUM e.V.". The association offers funding lines that also provide financial support for the work of TUM Student Clubs.

The application period for the funding line „funding projects“ (from 5.000 EUR) is still open until May 2. A variety of projects, such as scientific or artistic events, field trips or even travel to competitions and conferences can be supported by research grants or by providing non-monetary resources.

For more information on criteria and application, please visit the website of the [TUM Association of Alumni and Friends](#). Your contact person [Dr. Julia von Mendel](#) will be happy to answer any questions you may have.

Public Policy Impact Programme:

The program offers particularly committed student groups support with networking,

mentoring, access to workspaces and venues, and even financial support, which can be used for activities of the initiative such as events, workshops, (online) publications, etc.

For more information on the application and requirements, please visit the [TUM Think Tank website](#).

Inventor and Patent Consultancy

Does your student club develop innovative technical solutions? Would you like to get early advice on topics such as patent protection, utility models and intellectual property? Take advantage of free initial consultations from TUM ForTe in cooperation with patent attorneys, just send us an email to [studentclubs\(at\)tum.de](mailto:studentclubs(at)tum.de).

TUM Student Club Fair

Under the motto 'TUM Student Club Fair - get inspired, get involved,' student initiatives are offered a platform to present their activities and projects to interested students and staff, to get them excited about their topics, and to recruit new members.

The next TUM Student Club Fair will take place in winter semester 2025/2026, in the second week of lectures, at Campus Garching. Further information on how to register will be sent to all registered student clubs by e-mail and published in the info box on this website in June.

Workshops & Trainings

For the successful realization of your student club's activities, certain key skills can be of great benefit. Both TUM and external partners offer a variety of workshops and trainings:

- [Soft Skills](#) – TUM School of Social Sciences & Technology
- [Time Management and Self-Motivation: balancing studies and involvement in student clubs](#) – TUM ProLehre Studyskills
- [Key Skill Programs](#) – Interdisciplinary Plug-in Modules of TUM
- [Key Competences](#) – TUM School of Engineering & Design (for students of TUM School ED)
- [Intercultural Communications and Language Courses](#) – TUM Language Center
- [Career Topics and Application Training](#) – TUM Career Service
- [Mentoring Programs und Job Talk](#) – TUM Alumni for Students
- [Software courses](#) – Leibniz-Rechenzentrum

- [Virtuelle Hochschule Bayern \(vhb\)](#)

Many student clubs also offer trainings in their field. Just reach out to your fellow students - you can find contact information for the various initiatives on this website. There are certainly numerous opportunities to advise and train each other.

Offers for Entrepreneurship Enthusiasts

Would you like to learn more about entrepreneurship and starting a business? TUM supports you in your TUM Student Club start-up project with a comprehensive range of consulting and qualification services:

- The basics of setting up a business: [Offers by TUM Entrepreneurship](#)
- Business creation in technology-based domains: [TUM Venture Labs](#)
- Entrepreneurship qualification: [Programs of TUM and UnternehmerTUM](#)

Your student club develops innovative technical solutions? Take advantage of the free consulting offer via TUMForte, find out more under [inventor and patent consultancy](#).

Tips for increasing the awareness for your TUM Student Club

- Keep your website or social media account up-to-date, so that interested students can find out about the activities of your student group and can get in touch with you.
- Present the activities of your student initiative to the TUM community at the TUM Student Club Market and network with interested students and other student groups at TUM.
- Introduce your TUM Student Club on our website. To do so send us the completed [self-declaration](#) as well as 1-3 sentences in German and English via e-mail to studentclubs@tum.de.
- Once your TUM Student Club has been [accredited](#) by the Council of Students Representatives, it will be published on the website of the TUM Students Council and TUM Campus App and you can also use the infoscreens.
- To promote an event or activity of your Student Club you can use the [social media channel of TUM](#). Feel free to get in touch with [us](#). In consultation with the [TUM Student Council](#), content can also be shared via their social media channels.

Further questions or feedback?

Please feel free to contact me – I will be happy to help you or to put you in touch with the right people.

Community & Student Engagement Manager **Anne Hüttenrauch**,
M.A. studentclubs@tum.de

TUM Student Clubs at a glance

There is a broad variety of outstanding, exciting student initiatives at TUM.

Academic & Education

Applied Mathematics Student Club Munich

A club for applied mathematics enthusiasts: The club brings together applied mathematics enthusiasts from the greater Munich area to collaborate on industrial mathematics, high-performance computing, computational modeling, and numerical analysis. They organize talks by international experts, networking events, workshops, and hackathons. Are you passionate about applied mathematics and want to become part of an open and collaborative community dedicated to advancing knowledge? Interested or want to join them? Check out their webpage: [Applied Mathematics Student Club Munich](#)

Campus Traders

Finance for everyone: Campus Traders members are eager to expand their understanding of capital markets, financial instruments, and trading, with a focus on personal growth. The goal is not to educate you for the industry, but for YOU. [Campus Traders](#) [Instagram]

ConsultTUM Club

Discover your strengths: At the ConsultTUM Club, you develop your consulting skills through peer-to-peer learning and build key future competencies. [ConsultTUM Club](#)

Edventure @ TUM

Building Education Expertise: Edventure is a Student Club that offers the opportunity to explore various career opportunities in the field of education, work on real-world educational projects, and develop an entrepreneurial mindset by developing solutions to

educational problems – with the long-term goal of establishing a group of education experts. [Edventure](#) [E-Mail]

EESTEC

Exchange of ideas: Students of Electrical and Computer Engineering can collect experience Europe-wide and make international contacts in workshops at universities and in companies. [EESTEC](#)

Business & Entrepreneurship

180 Degrees Consulting

Business consulting: The students in 180 Degrees Consulting provide advice to charitable and social organizations. Their aim is to develop innovative, practical and sustainable solutions. [180 Degrees Consulting](#)

Academy Consult

Student consulting services: Academy Consult members gain experience in the working world by providing their consulting expertise to companies in a wide range of sectors. [Academy Consult](#)

Akademischer Börsenzirkel München

Independent educational work on financial market topics: Munich students bring what is happening in the financial and capital markets closer to the general public. They also organize lectures and workshops in cooperation with companies to build a bridge between theory and practice. [Akademischer Börsenzirkel München e.V.](#)

enactus (Munich & Straubing)

From Bavaria to Burkina Faso: This student group is dedicated to improving people's quality of life by helping them support themselves financially.

- [enactus Munich](#)
- [enactus Straubing](#) [Instagram]

Family Business Club

Focus on family businesses: The Family Business Club is a student initiative within the TUM School of Management aimed at all TUM students who are interested in family businesses. Our role is to offer you the opportunity to get in touch with established companies and meet inspiring personalities. In doing so, mutual exchange is just as important to the club as the pursuit of knowledge and shared experiences. [Family Business Club](#)

Innovis VC

Club for people interested in venture capital: The Innovis Venture Club (VC) informs students on the topics of business start-ups and venture capital models. [Innovis VC](#)

Munich FinanceCircle

Insights into the world of business and finance: The Munich FinanceCircle is a dynamic platform created for students passionate about Corporate as well as Entrepreneurial Finance. As a member, you will have access to exclusive events, workshops and networking opportunities. [Munich FinanceCircle](#)

Public Makers

Future of the public sector: Through educational programs, workshops, and networking formats, students are empowered to actively and innovatively contribute to the transformation of the public sector. [Public Makers](#) [Instagram]

Quant Finance Club

Club for people interested in quantitative finance: Quant Finance Club is a group of Munich students dedicated to advancing quantitative finance, data science, and machine learning. The club aims to provide members with practical, hands-on experience through educational workshops and collaborative learning. [Quant Finance Club](#)

STARTmunich

Getting enthusiastic about entrepreneurship: Students learn about successful startups, work together with them – and invite entrepreneurs to their course of lectures. [STARTmunich](#)

TEG | The Entrepreneurial Group

Germany's oldest entrepreneurial student initiative encourages and supports students from various degree programs and all Munich universities to act entrepreneurially. Students gain inside into professional life through workshops, their own projects, through starting up businesses and various club activities. Moreover, they can build on the support of more than 300 club alumni. [TEG | The Entrepreneurial Group e.V.](#)

TUdesign Club

User Experience Design: the TUM Student Club TUdesign is dedicated to teaching students the principles of Design Thinking, important User Experience skills and tools such as Figma by doing a real-world project in small groups each semester. [TUdesign Club](#) [Instagram]

YFN @ UNIS

For students with an entrepreneurial spirit: The Young Founders Network is a community for young entrepreneurs. With events, workshops, and an incubator, it supports you from idea to funding — helping you turn your vision into reality. [YFN @ UNIS](#)

TU Investment Club

Understanding the financial market: This club focuses on financial education and hands-on experience by managing real-money investments through their own student-run fund. [TU Investment Club](#)

TUM Business Game

Case Studies: TUM Business Game provides students a platform to tackle real-world business challenges through case competitions and gain hands-on experience. [TUM Business Game](#)

TUM Case Club

Training problem-solving skills: Our mission is to build a network of like-minded people that enjoy regular exchange and participation at student case study competitions. Therefore, they regularly host educational events with professionals and case studies to prepare and exchange knowledge. [TUM Case Club](#)

Culture & the Arts

Accento Orchester München e.V.

Musical Commitment: The goal is to make classical orchestral music more accessible, especially for younger people. They have weekly orchestral rehearsals under the direction of professional musicians, which usually culminate toward the end of the semester in two moderated concerts with explanations of the pieces. [Accento](#) [Website]

AcTUM – the four-stroke drama

Theater group at the Garching campus: We are a diverse troupe of TUM students, doctoral candidates and staff members who stage plays in our spare time. During term time, we get together for weekly sessions of improvisation, technical exercises and games to improve our acting skills and have a bit of fun in the process! We are always looking to welcome new people – either as performers or backstage. We are passionate about drama and are convinced it is a cultural enrichment to life at the Garching campus. [AcTUM – Drama im Vier\(t\)akter \[four-stroke drama\]](#)

Baduk TU Go

Discover the game “GO”: The club offers the opportunity to learn and play the game "GO" in a positive and social environment. Its simple rules take just minutes to learn but the complex game takes a lifetime to master. [Baduk TU Go](#) [Instagram]

C2 – Campus-Cneipe

Social hub for the Garching campus: The Campus Cneipe (C2) enriches campus life in Garching with regular events such as the pub quiz or karaoke. With fair prices, it's the perfect place to enjoy an after study drink. Would you rather have the whole pub to yourself? Rent it for your personal (doctorate-) party. [C2 – Campus-Cneipe](#)

Campus After Hours

Radio station for students at Munich's universities: With interviews and contributions on the topics of research, student initiatives and startups, Campus After Hours informs about current events at Munich's universities. [Campus After Hours](#)

Cico Jazz Orchester

Big band for alumni and students: The Cico Jazz Orchestra brings together alumni from all universities, active students and musicians from the region to indulge in the many facets of jazz in an energetic big band line-up with vocals. Ready for regular rehearsals, exciting shows at home and unforgettable tours, such as to the partner band in Romania? [Cico Jazz Orchester](#) [Instagram]

Debating Club Munich

When debating at the club meetings or at tournaments, Munich students practice their communication and rhetoric skills – enabling them to join political debates and discussion. The club is a politically neutral platform. [Debattierclub München](#)

Disorientation Days

Interdisciplinary seminar series: The Disorientation Days invite students from all disciplines to lecture and project events dealing with socially relevant topics. [Disorientation Days](#)

Eat & Meet Munich

Club for Foodies: Eat & Meet Munich is a gastronomy club and a social community that brings together students who enjoy trying different cuisines and exploring new places. Let's eat, meet, and savor every moment together! [Eat & Meet Munich](#) [Instagram]

Faculties Football League

Soccer league of the TUM faculties and schools: Student teams and teams from the faculties and schools compete in the [Faculties Football League](#) [Instagram]

Fusian Dance Crew

Mixed hip-hop in Munich: Students learn different hip-hop dance styles in the Fusian Dance Crew, develop choreographies together and perform them at events. [Fusian Dance Crew](#)

Culture Club at TUM

Enjoying Culture – the Kulturklub at TUM is a platform that brings students together to attend cultural events. The club offers the possibility to either join events of the program set up by the active members or to propose events themselves and thus help to shape the program. [Kulturklub](#)

Munich eSports

Club for e-sports enthusiasts: The Munich eSports offers gamers a wide range of activities related to gaming and e-sports, such as weekly gaming evenings, public viewing of e-sports tournaments, and online and offline tournaments. [Munich eSports](#) [German]

planL_s studio

Creative exchange: planL_s studio collaborates with students on creative ideas and projects, ranging from international competitions to design-build initiatives. The goal is to enable free project work during studies. [planL_s studio](#) [Instagram]

Praias do Isar (Samba)

Samba Percussion in Munich: Praias do Isar (in English: Beaches of the Isar) is a student organized Rio style Samba Percussion School. This is the only Samba School of its kind in Munich and one of the very few in Europe. Get an opportunity to learn drumming without any previous experience, meet like-minded, rhythm-loving people and travel and perform all over Europe. [Praias do Isar](#)

Silicon Valley Canon Reading Club

Tech Reading Group: The reading circle critically engages with influential tech books, ranging from entrepreneurship and technology to broader issues of economics, politics, and philosophy, to make insights actionable and foster engaging discussions. [Silicon Valley Canon Reading Club](#)

Spark

Social-Media-Content-Creation: Spark is all about helping students achieve their creative goals and make the most of their social media presence! We're building a vibrant community where members can share knowledge, team up on projects, and develop their skills in different areas of content creation, including photography, videography, and graphic design. [Spark](#) [Instagram]

StOrch Studentenorchester München

TUMart Club

Creative together: The TUMart Club is a group of TUM students who want to bring the fine arts to Campus Garching. After a member has briefly introduced his or her favorite artist, relaxed drawing follows. No previous experience is necessary, just drop in: this semester SoSe23 every Friday from 14:15 to 15:45 in room CH 26410 (1st floor, orange part of the building) in the Chemistry Building in Garching behind the Science Cinema. Please bring some materials of your choice, even if it's just pen and paper. [TUMart Club](#) [E-Mail]

tu film

Cinema in the lecture hall: Every Tuesday and Thursday during the semester, the tu film transforms the Carl-von-Linde lecture hall in the city center and the MW 1801 lecture hall in Garching into real cinemas with a cinema projector and snack stand. [tu film](#)

TUM Bookclub

Reading circle for people interested in literature: At their meetings, members of the TUM Book Club discuss selected readings from various genres. [TUM Book Club](#) [Instagram]

TUM Dixieland Combo

New Orleans Jazz in Munich: The TUM Dixieland Combo consists of alumni, staff and students from all Munich universities. They rehearse on Tuesdays in the TUM rooms, hence the name. The classic Dixieland instrumentation (trumpet, clarinet, trombone, tenor saxophone, tuba, banjo, drums) plays New Orleans jazz, which originated over 100 years ago. [TUM Dixieland Combo](#)

TUM Jazzband

The TUM student big band: In the TUM Jazzband, students play a broad repertoire in big band formation and regularly perform at TUM concerts and events. [TUM Jazzband](#)

TUM Pixels Student Initiative

Creative Perspectives: The club combines photography, videography, and media design to capture student life from new angles. Whether working behind the camera or editing, members produce creative content that reflects real campus life.

International & Country-Specific

AEGEE

Europe-wide student forum: From conferences in Budapest to cultural events in Ljubljana – AEGEE promotes cooperation and intercultural exchange between young people in Europe. [AEGEE](#)

AIS – Association of Iranian Students in Munich

The **Association of Iranian Students in Munich** (AIS-Munich) primarily aims to support Iranian students, especially newcomers, with multiple aspects of their study, and to present a holistic and nuanced picture of Iranian culture to provide an atmosphere for integration and cultural exchange. [AIS-Munich](#)

Albanian Student Society at TUM

Experience Albanian culture and build connections: The Albanian Student Association at TUM invites all students to explore Albanian heritage through events, workshops, and networking. We promote intercultural exchange and support academic and professional growth, enhancing cultural diversity at TUM. [Albanian Student Society at TUM](#)

Sustainability & Health

100 Voices – One Planet

Climate crisis concerns us all: The international and interdisciplinary team of “100 Voices – One Planet” collects personal testimonies of 100 people from 100 countries about climate change to raise awareness about the consequences of the overheating of the earth. [100 Voices – One Planet](#)

Academic Energy Cooperative @ TUM

Academic Energy Cooperative: The student initiative deals with the foundation of an academic energy cooperative at TUM that contributes to the scaling of sustainable energy projects and combines them with teaching and research. It offers all interested parties the opportunity to gain practical experience and participate in the sustainable transformation. [Academic Energy Cooperative @ TUM](#)

AIAS Munich

Saving lives with stem cells: The AIAS e.V. team in Munich provides young people with information about leukemia and encourages students to sign up to the German bone marrow registry (DKMS). [AIAS e.V.](#)

Biogenesis

Health, optimization and longevity: Biogenesis is a student initiative at TUM that deals with scientifically based self-optimization. In an interdisciplinary exchange, students analyze bioactive substances, health tech and biotechnological strategies to promote health, performance and longevity. For this purpose, the club organizes lectures, workshops and analyses current scientific literature. [Biogenesis](#)

Future Foods

The future of sustainable food technologies: Our goal is to have a positive influence on our environmental footprint, increase animal welfare and reduce world hunger! To do so, our members can learn all about future food technologies like precision fermentation and cultured meat, visit startups and companies, collaborate with other student clubs around the world, and develop novel ideas in e.g., hackathons and microclasses. Your influence is needed to shape our future! [Future Foods](#)

Engineers without Borders

Development cooperation: Engineers Without Borders is a non-profit recognized aid organization that has been successfully carrying out development cooperation in Africa and Asia for almost 20 years to improve the living conditions of people in need. With us, students work together with alumni from all disciplines on projects to improve infrastructure and education.

- [Engineers without Borders | Aid organization](#)

Health & longevity enthusiasts: A community to collectively explore the field of aging, preventative measures, and in doing so unlock an alternative way of life. [MUN Centenarians](#)

PAN UG München TUM

Nutrition Education Network: The Physicians Association for Nutrition (PAN UG München TUM) educates medical students on nutritional topics to promote sustainable and healthy diets. [PAN](#)

Plant a Seed

Plant a Seed aims to realize the potential of sustainability concepts and integrate them into the urban environment by providing an interactive learning opportunity for students and inspiring creative implementation ideas. [Plant a Seed](#)

Environmental Department of the Student Representation

Sustainable campus life: The international and interdisciplinary team of volunteer students strives to integrate sustainability into campus life and raise awareness within the TUM family through projects and events. Additionally, they work within the realm of university politics to promote the structural and strategic integration of sustainability. [Environmental Department](#)

ReparadTUM

Bicycle self-help workshop: The student initiative **ReparadTUM** on campus Munich, Garching and Freising allows students and staff to repair their bicycles with provided tools and competent assistance. [ReparadTUM](#)

"Umwelt" lecture series

Since 1985, speakers from nature conservation organizations and the worlds of research and business have delivered talks on environmental technology, health, consumer rights and climate protection. [“Umwelt” lecture series](#)

School of Circularity

Making today’s students the circular leaders of tomorrow: At the School of Circularity, we believe that for a sustainable future, we need to transform to a circular economy. We want to drive this transformation by educating, connecting and empowering students from all background to become the circular leaders of tomorrow. [School of Circularity](#)

SRM Talks

Sustainable Resource Management Lecture Series: The SRM Talks Initiative organizes events around sustainable resource management for interested parties from all disciplines. [SRM Talks Initiative](#)

SusTUMable Design

Creative exploration of sustainable topics: Once a week, the AK susTUMable design at the TUM Campus Straubing brainstorms and sketches ideas for sustainable products and graphic designs. [susTUMable design](#)

The Green Team

Platform on the topic of sustainability: The Green Team aims to sensitize students to sustainability issues and supports them in the implementation of sustainable concepts. [The Green Team](#)

TU eMpower Africa e.V.

Fostering sustainable development of African communities through research-based solutions: We are a non-profit organization, which unites students, researchers, alumni and friends of TUM. All of us work on the question, how energy transition can foster sustainable development of communities in Africa. In addition, we are an accredited university group of TUM. [TU eMpower Africa e.V.](#) [Linkedin]

TUM HN Hiking Club

Experience the beauty of nature: The club goes hiking on weekends, starting from Heilbronn. [TUM HN Hiking Club](#).

TU Peak Seekers

Summit Hikes: The Student Club TU Peak Seekers unites students with a love for the great outdoors. On joint hikes to breathtaking peaks, you can admire the landscape and wild nature and build new, lasting friendships. [TU Peak Seekers](#) (LinkedIn)

uniMIND München

Academic journal club on psychedelic research: At the student initiative uniMIND Munich, students and scientists from all disciplines meet regularly with the aim of presenting the latest research results in the fascinating and controversial field of "psychedelic therapy" to each other, discussing them as a group and thus also improving their own scientific skills. [uniMIND München](#) [Instagram]

VACction

Information against vaccination fear: The team of VACction informs about the mode of action and chances of vaccines. In its portal, students' questions are answered and fears are reduced. [VACction](#)

Technology & Research

Akaflieg: since 1924

Taking to the skies in self-built aircraft: AkaFlieg has been designing and building gliders since 1924. And when the results are air-worthy, students get to pilot their own aircraft. [Akaflieg München e.V.](#)

AkaModell

The art of model aircraft: The members of AkaModell design and build remote-controlled model aircraft. The best part is seeing the finished masterpiece take to the skies. [AkaModell München](#)

Beta Sigma Club

Financial Mathematics: The club offers STEM students practical insights into applying mathematics in the financial markets through workshops and lectures. [Beta Sigma Club](#)

BetaTUM Student Beta Tester Community

Student Beta Tester Community: BetaTUM functions as TUM students' Product Hunt, facilitating connections between campus application creators and eager initial users to establish a robust user base. The club aims to expedite Germany's adoption of impactful digital technology. [BetaTUM](#)

Betonkanu TU München

Concrete canoe: Students are building a functioning canoe from heavy concrete. The key is getting the shape right. Every two years, students take part in the German concrete canoe regatta. [Concrete canoe](#) [Instagram]

Bioinformatics Munich Student Lab

The student-led Bioinformatics Research Initiative focuses on applying computational techniques and AI in the fields of biology and medicine. They offer opportunities for networking with researchers, industry professionals, and fellow students while gaining hands-on experience in innovative research projects. [Bioinformatics Munich Student Lab](#)

DASH

Physical assistance systems: DASH develops a lower-limb exoskeleton for fully paraplegic patients to help them regain mobility. The goal is to conquer the CYBATHLON competition taking place in 2024. [DASH](#)

Elara Aerospace

Into space and beyond: At Elara Aerospace, students explore space, sustainability, propulsion, materials, aerodynamics and sensors. Elara Aerospace is aiming for the first student-built Methalox rocket to reach 100km. Join us on our journey to industry impact! [Elara Aerospace](#)

EnHands

Prosthetic hands for developing countries: EnHands constructs affordable and robust hand prostheses for low-income countries. If you're interested in mechanics, prosthesis design, 3D modeling, 3D printing or robotics, contact them via their website and join the group – new members are always welcome. The group meets online at 6pm every Monday, and for an in-person workshop in Garching once a month. [EnHands](#)

Falcon Vision

Saving lives through intelligent search & rescue: the Student Club Falcon Vision wants to bring the world of AI and autonomous systems closer to the students and make it tangible. They develop AI-supported drones for the air rescue of missing hikers in the mountains. [Falcon Vision](#)

HORYZN

Every second counts! We are a team of students developing rapidly deployable drones for transporting medical supplies and competing in the largest international aeronautical competition in the world - GOAERO. [HORYZN](#)

Hummingbird

Gas turbines that hum: The team develops, tests and optimizes gas turbines in its own design atelier, looking at factors like the drive system and acoustics. [Hummingbird](#)

iGEM Munich

For tackling everyday issues by synthetic biology, student groups compete annually at the international Genetically Engineered Machine (iGEM) competition, initiated at MIT in Boston. [iGEM Team Munich](#)

iGEM Straubing

The International Genetic Engineering Machine is a nonprofit organization advancing and building the future of Synthetic Biology. At iGEM Straubing, we build on the passion and expertise of our campus to contribute to iGEM and compete at an international level. The Straubing Campus' dedication to biotechnology provides the perfect environment for sustainable growth.

Impetus Sailing

Sustainability in boatbuilding: The students of the Impetus Sailing student club are passionately dedicated to the research areas of boatbuilding, sustainability, materials science, fluid dynamics, aerodynamics, and composite and marine sensor technology. The club's first major milestone is to participate in the "1001 Vela Cup" competition in 2024. [Impetus Sailing](#)

LEVITUM

Development of a hydrogen drone: The LeviTUM team is working on the development and construction of a hydrogen-powered eVTOL drone. [LeviTUM](#)

MedTech OneWorld Students

Medtech projects for developing countries: MedTech One World Students (MTOWS) works together with local partners on medtech projects which focus on the needs of developing countries. Students from all fields are welcome to participate and pitch project ideas. [MTOWS](#)

Munich Bioneers

Pioneering work in biosensor research: The Munich Bioneers develop biosensors for disease monitoring, participate in the SensUs competition, and organize exciting events like expert talks and networking sessions. [Munich Bioneers](#)

neuroTUM

Combining Neuroscience and Engineering: neuroTUM is a group of students who would like to share their enthusiasm about neuroengineering and make this interdisciplinary research area more accessible. They are collecting hands-on-experience by developing a brain-computer-interface (BCI) system to non-invasively decode electrical signals into precise control commands using Deep Learning architectures. [NeuroTUM](#)

OneAIM

Innovation in Medicine & Technology: OneAim offers programming courses, lectures, and structured training to explore the interdisciplinary interface between medicine and technology. Participants will analyze and understand the application of modern technologies in clinical settings and work hands-on in interdisciplinary teams to develop innovative solutions. [OneAIM](#)

Phantum

Supersonic UAV: Phantum is a student initiative focusing on developing high performance, record-breaking UAVs. They are currently building the world's first supersonic RC airplane. [Phantum](#)

RoboTUM

Better Robotics at TUM: We are building the world's fastest humanoid robot! Join us in bridging the robotics industry and academia through hands-on projects, culminating in the annual Munich Robotics Summit. [RoboTUM](#)

Student AirRace

Race of the Future: Student AirRace has the goal of providing a hands-on experience for aviation enthusiastic students and promoting Urban Air Mobility. The team is doing this by developing a Racing Competition for Unmanned Aerial Systems with a maximum takeoff weight of up to 25kg in which international university teams can take part. [Student AirRace](#)

Synchronized Skies

Designing a connected world: Synchronized Skies is a student club at TUM exploring innovative applications of swarm technology. [Synchronized Skies](#)

Technolitics

Technolitics empowers students to actively shape the intersection of technology, politics, and society while developing innovative solutions for current and future challenges.

Technolitics [contact follows]

TUfast

Student racing team: TUfast is the formula student initiative of the TUM. They design, develop, manufacture, and test a race car every year, which they then use to compete against the top teams during the summertime in the international Formula Student competitions. Students can either join the Racing, Eco or Moto Electric Team. [TUfast e.V.](#)

TUM Blockchain Club

All things blockchain: The TUM Blockchain Club is dedicated to advancing blockchain technology and decentralization. It hosts networking and educational events, supports students with their projects, and aims to help connect academia with industry. [TUM Blockchain Club](#)

TUM Boring – Innovation in Tunneling

Aiming to build the world's fastest tunnel boring machine: TUM Boring – Innovation in Tunneling is a Munich student initiative that develops innovations in underground transportation and won in Elon Musk's Not-a-Boring Competition with its tunnel boring machine. [TUM Boring – Innovation in Tunneling e.V.](#)

TUM Carbon Removal Initiative

Mitigating the effects of climate change through carbon removal: The TUM Carbon Removal Initiative e.V. is a student association developing a scalable CO2 capture and storage technology to reduce the concentration of CO2 in the atmosphere. [TUM Carbon Removal](#)

TUM Hyperloop

High-speed capsule: The team from TUM has won the Hyperloop Pod Competition organized by Elon Musk multiple times. Their capsules are prototypes for a futuristic train designed to travel through vacuumized tubes at almost the speed of sound. [TUM Hyperloop](#)

TUM Green Tech Initiative

Projects and competitions for the development of green technologies: The TUM Green Tech Initiative offers students at the Technical University of Munich who wish to make a

meaningful contribution to the promotion of sustainability the opportunity to participate in various projects for the development of green technologies. They can also take part in student competitions if interested. [TUM Green Tech Initiative](#) [Instagram]

TUM Phoenix Robotics

Practical robotics: The TUM Phoenix Robotics group is dedicated to planning, developing and building robotic systems. Their main projects are multifunctional robotic vehicles and multicopters. [TUM Phoenix Robotics](#)

WARR

Reaching for the stars: From cube satellites to a space elevator – this scientific workgroup for rocket science and space travel focuses on practical space-related projects. [WARR](#)
