

No admission restrictions

There is no limited admission quota for the B. Sc. in Information Engineering at TUM Campus Heilbronn. Every applicant who masters the selection process is given the opportunity to start their studies in this program.

Aptitude assessment only after VPD submission

After you have submitted a self-declaration with your application that you have applied for a VPD and all other application documents have been uploaded correctly and completely, you will receive a grace period to upload your VPD.

Once you have uploaded your final VPD, your application will be processed further. Before that, participation in the selection process is not possible.

Aptitude Assessment

After submitting your application, your documents will be checked and evaluated according to a points system. If your application is formally correct, your application can receive up to 100 points in the application process. The score is made up as follows:

- The overall grade of the university entrance qualification accounts for 65%.
- The remaining 35% consists of the English grade, the math grade, which is worth three times, and the best natural science, which is worth two times.

Notarization of Documents

During the online application process, you upload digital versions of your documents. The decision about your admission is based on these files. If you receive an offer of admission, we require

certified hardcopies of certain documents for enrollment, e.g. of diplomas or degree certificates.

This is the only way to ensure that the files we use to evaluate an application are identical with the original documents.

If you receive an offer of admission and accept your study place, TUMonline will generate a list with the documents we require as certified hardcopies for enrollment

Do not send in original degree certificates - TUM cannot assume liability for unsolicited originals.

We digitalize all documents and **destroy** the hard copies after a period of 1 year.

Please make sure your notarized copies comply with the requirements described here:

<https://www.tum.de/en/studies/application/application-info-portal/notarization> **If they do not, we cannot accept them.**

Rejection

We completely understand your disappointment.

We kindly ask for your understanding and would like to assure you that your application has been checked according to our standard procedure described here:

https://www.cit.tum.de/fileadmin/w00byx/cit/Studium/Studiengaenge/Bachelor_Information_Engineering_Heilbronn/2024-035_AES_EFV_Information_Engineering_04.04.24.PDF

Considering the high volume of applications it is not possible for us to provide all of the applicants further insight into the results beyond that.

However, we are glad to inform you that you still have the opportunity to reapply to the B.Sc. in Information Engineering program in the future if you have only been rejected once.

We wish you all the best and good luck in the future!
