

Is my qualification sufficient to study at a university in Germany?

If your degree corresponds to a German university entrance qualification, you can apply at any time. On the following website you can check whether your qualifications are sufficient to study at a university in Germany: <https://www.uni-assist.de/tools/check-hochschulzugang/>

uni-assist

Applicants with an international higher education entrance qualification must have their documents reviewed through uni-assist. If you have previously studied at a university you should also submit your transcripts for review, as this may also serve as proof of your qualification.

While we always recommend applying in advance to uni-assist, you do not need to present their answer by the application deadline. By then, you only need to upload a self-declaration that you applied to them.

Please use this form:

https://www.cit.tum.de/fileadmin/w00byx/cit/Studium/Studiengaenge/Bachelor_InformationEngineeringHeilbronn/Formblatt_Bestaetigung_VPD_mit_Merkblatt-Application_Confirmation_VPD_with_Factsheet.pdf

Application processed centrally

Since applications are processed centrally at TUM, we as a faculty do not have access to your documents. Unfortunately, we cannot give you an update on your potential admission.

However, you can be sure that the sooner you apply, the sooner you will receive feedback.

Please check your TUMonline account regularly to make sure that you are up to date.

Late submission of documents

In order for your application to be considered, all required documents (German A2 certificate, etc.) must be submitted by the application deadline. Application-relevant documents cannot be submitted later. Provisional documents (e.g. provisional certificates) cannot be considered either.

The only exception is the VPD document from uni-assist, which can be submitted after the application deadline if you include a self-declaration that you have applied for your documents to be checked by uni-assist.

Please use this form:

https://www.cit.tum.de/fileadmin/w00byx/cit/Studium/Studiengaenge/Bachelor_InformationEngineeringHeilbronn/Formblatt_Bestaetigung_VPD_mit_Merkblatt-Application_Confirmation_VPD_with_Factsheet.pdf

Application with an IB Diploma / VPD (uni-assist)

IB graduates can have their transcript sent directly from their school or International Baccalaureate Organization to uni-assist. During the online application via TUMonline, you need to upload your Official Transcript of Grades. If you do not have a Notification of the Office for Certificate Recognition, you also need to confirm the timely completion of your application for a VPD via uni-assist by uploading the self-declaration form.

Please find more information regarding this on our website here:

<https://www.tum.de/en/studies/application/application-info-portal/applicants-with-international-baccalaureate>

APS

On the following website we have compiled the most important information on APS requirement, application and submission to TUM:

<https://www.tum.de/en/studies/application/application-info-portal/aps>

Application to a higher semester

We generally recommend that you apply for the regular program start in the winter as a first semester student and then submit an application for recognition of achievements from previous studies to us within your first year of study.

If you apply to the summer semester, you will need to meet all of the requirements for admission in addition to submitting all of the necessary documents to apply for credit recognition at TUM. Please note that you will need to achieve recognition of at least 28 ECTS from previous studies from TUM and get admission in order to take part in the program.

How can you check whether you are qualified to apply to a higher semester?

Please check whether you have studied in a similar study program by comparing the TUM modules with the modules you have completed within your previous studies. Please complete the following checks very carefully for each module!

1. Content: In order to check whether the content matches, please check the TUM module descriptions that you find on our website in detail:

<https://www.cit.tum.de/en/cit/studies/degree-programs/bachelor-information-engineering/degree-charts/>

The content of the modules must roughly match.

2. Workload: In order to check whether the workload matches you will need to convert your credits into ECTS. At TUM 30 hours of work are connected with one ECTS, e.g. modules with 8 ECTS have 240 working hours. The number of working hours must be roughly the same.

3. Minimum credit requirement: Last, please check whether you can provide proof of at least 28 ECTS for credit recognition at TUM. Ideally, you need to have a buffer (of more credits) because generally, not all of the submitted modules will be recognized by TUM.

Language Requirement

The main instruction language of the program is English. However, some elective courses may be taught in German.

An A2 German certificate has to be submitted as part of the application by the deadline. There are no exceptions.

An English language certificate is not required for the application. If there are doubts about English proficiency, an interview will be scheduled as part of the aptitude assessment.

On this page you can check whether your language certificate will be recognized by TUM:

<https://www.tum.de/en/studies/application/application-info-portal/admission-requirements/language-certificates>
