

**Welcome to the
Information Session on:**

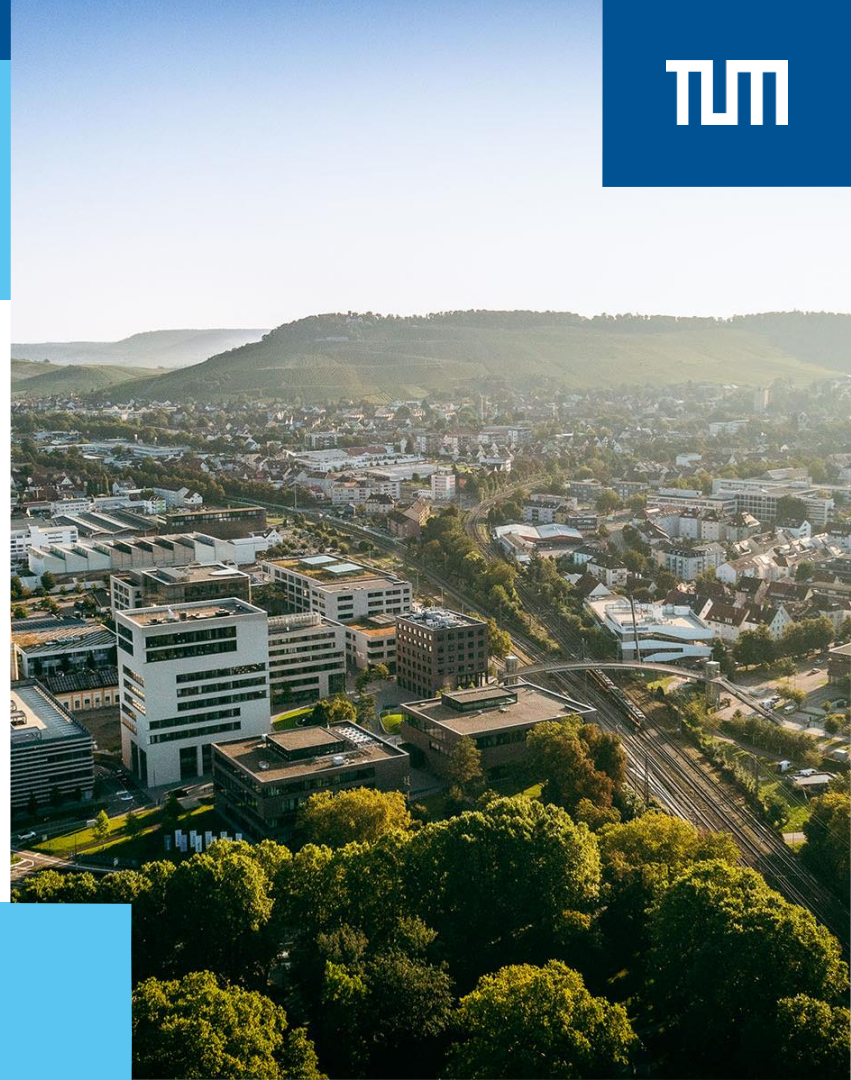

**Recognition of
Achievements from
Previous Studies**

**School Office Heilbronn
Academic and Student Affairs
April 17, 2025**

What to expect today

Information about...

- ✓ Regulations
- ✓ Overview of the review process
- ✓ Application steps and checklist
- ✓ Sample documents
- ✓ Q&A

About Us

The ASA will help you with all study-related questions and organizes informational events. You can contact us with program-specific questions like lectures, exams and recognitions of achievements of former studies. We will also regularly contact you via e-mail regarding important regulations, information on modules and exams and further interesting news for you.

Leonie Kontusch
Head of ASA

Denise Varlien
Deputy Head of ASA

Kumali Schoen
Administrative Staff ASA

Selina Eid
Administrative Staff ASA

Katrin Toborg
Administrative Staff ASA

Regulations

If you have received admission and **completed enrollment**, you have the possibility to apply for recognition of achievements from previous studies at a university.

This is possible if the *knowledge and skills* acquired match those of the B.Sc./M.Sc. in Information Engineering modules and if there is no significant difference between the *learning outcomes*.

If you decide to apply for recognition of achievements, please note:

- You can only submit **one application within your first academic year** in the program

Which modules can I apply for?

- In general, it is possible to apply for recognition of achievements for any module in your program (except the thesis and colloquium!)
- If the assessment determines that your achievements are **equivalent** to a TUM module, we will process it as a **1:1 recognition**.
- A **free recognition** is also possible, e.g. after completing previously approved courses during a study abroad.
 - Only if an application for 1:1 recognition is not possible, you may apply for a free recognition by listing the respective areas you are applying for (e.g. *computer science elective*, *support elective*, etc.) rather than specific module(s). This is more challenging to get recognized.

Overview of the review process

Two-Step Process: Formal and Content Assessments

1. Formal Check: Assessment by the Academic and Student Affairs (ASA) office
 - Is the application formally correct? Are all required documents submitted? Has the module been successfully passed (transcript)?
2. Content Check: Assessment by the professor/expert who is responsible for the module
 - Do the learning outcomes and skills match with TUM (module descriptions)?

Step 1 – Examine the modules in detail

When you prepare your application, please check carefully:

- **Do I have the necessary documents** (official module descriptions, transcript, translations, etc.) and do they **meet the formal requirements** for application?
For example, does my transcript indicate that I passed the respective course? Can I provide an official translation of my documents in English or German?
- **Do the learning outcomes and skills match?** Please examine the TUM module descriptions in detail and compare them with your module descriptions. The content and learning outcomes must match.

We highly recommend a consultation before you submit your application as you only have one chance to apply.

Step 2 – Prepare your documents

- Fill out the application form and save it in a PDF as follows: *“application_recognition_lastname_firstname”*
- Include the following PDF attachments:
 - **Transcript**
“transcript_lastname_firstname”
 - **Course Content Descriptions**
“module_description_modulenummer_modulename”
 - **Grading System (if different)**
 - Official document including max. & min. *passing* grades: *“gradingsystem_lastname_firstname”*
 - **Credit System (if different),**
 - Official document explaining the credit system: *“creditsystem_lastname_firstname”*

Step 3 – Contact the ASA office

- Before you submit your application, we highly recommend that you visit our consultation hour. Once all of your documents have been properly prepared, please send them via email to the Academic and Student Affairs office at credit_recognition.soh@xcit.tum.de.
- We complete the review in phases. All mandatory modules offered in that respective semester are checked first.
- Please note that it can take several months until you get the results. *Be mindful of exam timelines and submit your application as early as possible.*

How to contact us

The **application form** and **guidelines** are available on our website in the section „Further useful information for your studies” (bottom of the page):

- www.cit.tum.de/en/cit/studies/degree-programs/bachelor-information-engineering
- www.cit.tum.de/en/cit/studies/degree-programs/master-information-engineering

Contact us via email: credit_recognition.soh@xcit.tum.de

Consultation Hour Regarding Applications for Recognition (Zoom):

- 1st and 3rd Friday of each month from 10-11 a.m. (The next consultation hour will take place on April 25th, 2025!)
- <https://tum-conf.zoom-x.de/j/62215486938?pwd=YIRKdDIzSWw0OFkralE4bEFnU0p1UT09>
- Meeting-ID: 622 1548 6938, Code: 598361
- Please double check for short-term changes before you join:
<https://www.cit.tum.de/en/cit/studies/degree-programs/bachelor-information-engineering/consultation-contact/>
<https://www.cit.tum.de/en/cit/studies/degree-programs/master-information-engineering/consultation-contact/>

Step 4 – Formal Check by ASA

- Is the application formally correct & complete?
- Have all of the necessary documents been submitted? Are they in official English or German translations?
- Was the course successfully *passed* (transcript)?

If your application does not pass the formal review, we will need to cancel the application due to formal reasons.

If your application meets all formal requirements, it will be forwarded for review by the professor/expert responsible for the module.

Step 5 – Content Check by Professor

The professor/expert responsible for the module at TUM will check your application with attention to:

- Do the learning outcomes and skills match (module descriptions)?

The result will be communicated to ASA. Afterwards, you will be informed about the result by email.

Sample Application Form (Page 1)

Application for recognition of achievements from a previous degree

Chairman of the Examination Board: Prof. Dr. Michael Gerndt

Personal Data & current Course	Previous Course & University
First name: John	Name of previous University: University of Westminster
Surname: Doe	Country of previous University: England
Street and house number: Musterstrasse 123	Previous Degree program: Computer Engineering
ZIP, Location, Country: 74076 Heilbronn, Germany	Diploma: Bachelor of Science
Phone number: 0123/4678910	Number of semesters in previous course: 4
TUM Email address: johndoe@tum.de	Workload of one credit in your former University: 1 CP = 25 hours (e.g. 1 CP = 30 h of work in total)
Course at TUM: Information Engineering	Maximum grade at your former University: 10
Aimed Degree: Bachelor of Science	Minimum passing grade at your former University: 5
Registration number at TUM: 123456	
Semester at TUM: 1st	

Sample Application Form (Page 2)

I hereby apply for the following recognitions:

Courses from the previous university				Corresponding course at TUM		
Module Nr	Titel	Credit Points	Original Grade	Module Nr	Titel	ECTS
MAT-111	Calculus	3	3,7	INHN0014	Computational Mathematics 2: Calculus	8
MAT-121	Differential Equations	3	4,0	INHN0014	Computational Mathematics 2: Calculus	8
INF-211	Informatics	6	2,7	INHN0001	Introduction to Informatics	6

Date: 21.10.2024

Signature:

Sample: Calculation of Workload

The workload per credit at your previous university may differ from the workload per 1 ECTS at TUM.
At TUM 1 ECTS = 30 hours of work.

The course **Computational Mathematics II: Calculus (INHN0014)** counts for 8 ECTS.

- 8 ECTS x 30 working hours = 240 hours (TUM)

For example, the credit system at your previous university is as follows:

1 CP = 25 hours of work

The courses Calculus and Differential Equations at your previous university count for 6 CP.

- 6 CP x 25 working hours = 150 hours (previous university)

Sample: Grading System

Performance	Letter Grade	Grade Point
Highest achieving grade	A	4.0
	A-	3.7
	B+	3.3
	B	3.0
	B-	2.7
	C+	2.3
Minimum passing grade	C	2.0
Failing grade	C- or below	1.7 or below

Sample: Conversion of Grades

To convert your grades, we use the following conversion tool:

Link: <https://www.tum.de/en/studies/application/application-info-portal/grade-conversion-formula-for-grades-earned-outside-germany>

Mat 111-Calculus with 3 CP according to transcript:

Highest achieving grade at previous university: 4,0

Minimum passing grade at previous university: 2,0

Total GP achieved for this course: 3,7

Your grade in the TUM grading system: 1,4

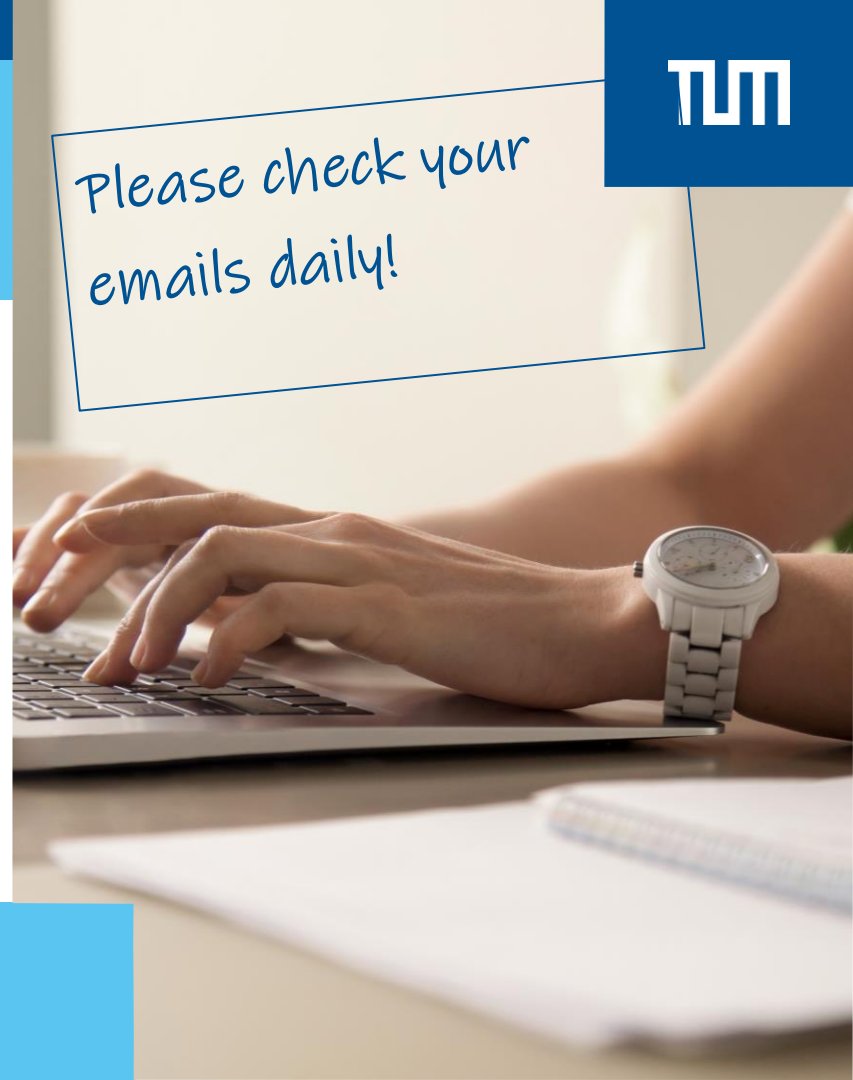

Email Etiquette

If you send us an email, please check:

- ✓ Did I mention all relevant information (= **your proper name, matriculation number, your study program, which semester you are in**) in the mail?
- ✓ Was the email sent from an official TUM address?
- ✓ Did I use a salutation?
- ✓ Is my request clear and friendly?
- ✓ Did I sign the email with my name?
